Custom Business Insights

A Plug and Play Dashboard that Enhances the Entire Data Spectrum for Your Agency.

Unvalidated and inconsistent data results in a lack of data confidence, integrity and reliability. When data is unreliable, the potential for conflicting data is high. This leads to uncertain decision-making and a greater risk to an organization that has its patients' best interests at heart. Plus, if data is difficult to find and understand, confusion is bound to arise with your team.

Real solutions are tailored. Our team provides affordable, comprehensive and customized post-acute care consulting services that are scalable to your company's unique needs.

KPIs to Run

Agencies need a core set of Key Performance Indicators (KPIs) that are comprehensive, historically trending and predictive. They should be based on validated data and subsequently lead to solid decision-making at every operational level. These KPIs should be easily viewed at a granular level (Patient & Worker) and up to a broad level (Branch, Region, Agency). Canned reports can sometimes meet these needs, but agencies need to manipulate these reports to try to identify gaps, trends and risks. This only opens doors to human error and a lack of efficiency.

Set a New Standard of
Data Confidence

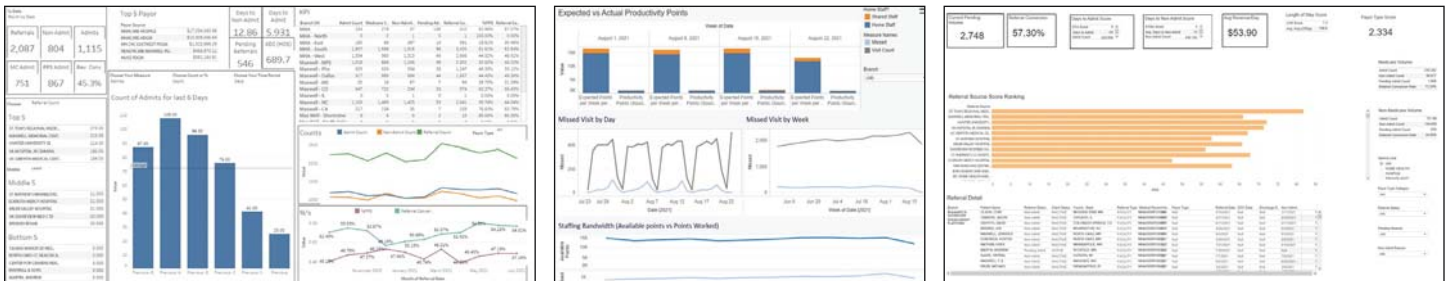

Custom Business Insights

MHA's Custom Business Insight Reports

MHA's Custom Business Insight (CBI) Reports is a plug-and-play tool that immediately enhances the data spectrum for any agency. It provides an easy button to data-driven performance and provides cutting-edge analytical tools. It sets a new standard of data confidence for users at every level.

The support of CBI Reports is ongoing via a monthly subscription service once deployed. The core deployment includes EMR stock dashboards as well as customized dashboards. Training is always included regardless of tier. MHA will support maintenance, include new releases, and offer consistent support for customers. While the CBI is configured to meet the needs of most agencies, there is a level of customization and custom integration included.

Why choose MHA?

MHA is known for its post-acute expertise in the industry. We're simply one of the few firms that is taking a solid step forward in the data analytics space. In doing so, we've built up a certified team of data scientists, developers, coders, and statisticians to help with any data requirement. Plus, the CBI Reports is an affordable, custom tool that is beyond any other on the market. It has a direct pulse on improving the operational performance of any agency.

People. Process. Technology.
